

INGELELA LIKITH RAJ

Aspiring SOC Analyst | SIEM | Splunk | Threat Detection | Security Operations
Windows & Linux Security | Cybersecurity Enthusiast

✉ snkth123@gmail.com [in](#) [LinkedIn](#) [GitHub](#)

CAREER OBJECTIVE

Final-year Computer Science Engineering student with a strong passion for Cybersecurity and Security Operations. Aspiring SOC Analyst with hands-on experience in SIEM, Splunk, security monitoring, log analysis, and threat detection. Built practical skills through personal projects focused on Splunk dashboards, Windows Event Log analysis, and security monitoring use cases. Eager to apply technical expertise in a real-world environment and actively pursuing entry-level opportunities, internships, and SOC L1 roles to launch a career in cybersecurity.

EDUCATION

Vel Tech University, Chennai	2022–2026
B.Tech Computer Science & Engineering	(CGPA: 8.07/10)
Narayana Junior College, Nellore	2020–2022
Class XII (MPC Stream)	(Percentage: 79%)
Ratnam High School, Nellore	2020
Class X (SSC Board)	(Percentage: 96%)

TECHNICAL SKILLS

Cybersecurity:	SIEM, Splunk, Threat Detection, Security Monitoring, Log Analysis Windows Event Logs, Linux Security, Network Security
Programming:	Python, Java, HTML, CSS, JavaScript, PHP
Tools & Frameworks:	Flask, XAMPP, VS Code, Eclipse, Git, Postman
Databases:	MySQL
Libraries:	NumPy, Pandas, Matplotlib

PROJECTS

Brute Force Detection using Splunk SIEM	2026
Developed a Splunk dashboard to detect multiple failed login attempts (Event ID 4625), identify brute force attack patterns, and monitor affected hosts and user accounts. Configured automated email alerts using Gmail SMTP for real-time notification.	
Potential Account Lockout Detection using Splunk	2026
Built a monitoring dashboard to identify accounts approaching lockout conditions due to repeated failed authentication attempts (Event ID 4625). Provided early warning indicators for SOC analysts to proactively respond.	
Windows Authentication Monitoring Dashboard	2026
Created a Splunk Dashboard Studio solution to monitor successful (4624) and failed (4625) Windows logins, visualize authentication trends, and analyze suspicious login activity across hosts.	
Predictive Data Analytics Framework for Smart Healthcare	2024
Developed comprehensive ML framework for data-driven healthcare decisions using Python, Pandas, NumPy, and Matplotlib. Implemented predictive algorithms for patient care optimization and hospital management with scalable enterprise architecture.	
Ghost - Multi-Source Intelligence Tracking System	2023
Developed a real-time monitoring platform integrating satellite tracking, global news feeds, and custom APIs. Built interactive dashboards using modern web technologies to visualize intelligence trends, demonstrating strong full-stack and API integration skills.	

CERTIFICATIONS

Cloud & AI Integration Workshop	Vel Tech	Feb 2025
Software Testing Workshop	Vel Tech	Sep 2024
Raptee.HV Codevolt Hackathon	VIT University	2025

SOFT SKILLS

- Problem Solving
- Team Collaboration
- Adaptability
- Time Management
- Analytical Thinking
- Communication
